Dear Mrs. L. Wineberg,

Greetings from Ambergris Caye Elementary School also known as ACES. I am hereby soliciting your collaboration with our school to establish a teacher support program. This program will enable assistance for teachers by having a teacher helper, who can collaborate with them to prepare visual aids/ materials and work with students one to one. This program will then require an individual or group willing to come to San Pedro Ambergris Caye, Belize for a number of days and also have a background in education. The preferred time is during the first term of the school year which is September to November.

ACES is a small community school with eight classrooms equivalent to grade one to grade eight and approximately ninety students. The teacher ratio is 1:15 students with diverse learning at its best. We are the only school that enrolls a few students with special needs, however they are integrated in their respective age level classroom. Our general education teachers do an amazing job by providing different teaching/learning methods for such groups, however extra help will facilitate the learning to be successful for each diverse classroom.

Further information in regards to developing a program or about our school can be made via email at [amandab@aces.edu.bz](mailto:amandab@aces.edu.bz) . I look forward to work with you.

Sincerely,

Amanda Burgos  
Principal
